#### MR. RANDALL'S POSITION.

Mr. RANDALL would assume a responsibility for himself and his party that' no Democrat can afford to incur, in standing out for a total abolition of the internal revenue taxes.

To cut off \$120,000,000 of revenue from luxuries or vices would involve the necessity of raising at least \$20,000,000 more than now from the necessaries of the people.

How can any Democrat favor such a policy

The internal taxes are no more "war taxes" than is 30 per cent, of the present tariff taxes. The internal taxes have been cut off and cut down until only spirits and tobacco are taxed, and the revenue from this source has been reduced from \$309,000,000 to \$120,000,000. The tariff is still within 1 point of the war maximum, and it vielded last year \$38,000,000 more than at the close of the war.

Cut down the war tariff, too.

# THE RIGHT SPIRIT.

The Southern people have greatly increased their respect for the will of the majority since their disastrous " kick " in 1860.

A majority of the people of Atlanta having Wonno that "not the slightest ill-feeling survives the contest." On the contrary, prominent men on both sides are to meet in conference to devise the wisest plan for restricting the traffic within reasonable limits. and for securing observance and enforcement of the law.

This is the true American spirit : Fight out issues at the polls, and then acquiesce in the result and proceed to business,

# THE MARCH OF MONOPOLY.

The monopolists have invaded New England, and are engaged in the congenial task of gobbling up everything.

The West End Land Company has a tight grip on every spoke in the Hub, having absorbed all the horse-cartracks in the city and suburbs. The Boston and Maine Railroad is swallowing rivals and connecting lines with unscrupulous greed.

About these and other similar schemes there is a distinct flavor of boodle. Monoply and corruption, in New England as else-

where, go hand in hand. Thus proceeds the march of monopoly. It is establishing its stronghold in every State and every city. Nothing goes amiss in its insatiate maw. It has no conscience and therefore no scruples.

Let the people apply the scourge of stringent law, and teach it the lesson of fear.

# NOT A CLEAN SWEEP.

There are 55,157 post-offices in this great country. The Administration has made 35,828 appointments in the past two yearsby far the larger number on account of resignation, expirations of commission or the establishment of new offices. This leaves nearly 20,000 of the old in-

cumbents in possession.

Surely the Republicans have no just reason to complain. It is a good ways from a clean

# THE HIPPODROME BLIGHT.

The lack of interest in the BEACH-HANLAN race is the natural result of the lack of confidence in scull contests. Professional oarsmen have so often broken faith with the public that the public is inclined to ignore them in contempt.

Baseball maintains its supremacy among sports largely because it is thought to be honestly conducted. When it begins to savor of hippodrome methods its decline. Administration?

will begin. It would be well for the diamond magnates to take this cold fact to heart.

Fair play, or no play.

# THE DANGER STILL EXISTS.

In the interview with JAY GOULD at Marseilles, published in the Sunday WORLD, 'the wizard" observed that if the Treasury had not released some of the hoarded surplus last summer " we might have had a panic in New York, and that would have turned the scale against the Democracy."

Such a panie might turn the scales next

The conditions for it exist in the continuing and increasing surplus. The people will not approve a policy of bond purchases at high premiums. There is no other outlet save in extravagant appropriations. To hoard means a panic. To spend invites the rebuke of the taxpavers.

The surplus should be stopped.

### THE NEWARK TUFT-HUNTERS.

The haughty society of Newark has been entertaining an alleged " scion of an English noble family," who now appears to be one of Inspector Bynnes's distinguished friends.

"My lord" has suddenly disappeared, and, as usual in such cases, there has been a simultaneous disappearance of some of the funds of the tuft-hunters.

There is not so much difference between a bogus lord and a genuine one as might appear at first blush. A title is a pretension of superiority at the best.

The rich tuft-hunters of Newark should congratulate themselves that, though they have lost a few dollars, they have at least saved their daughters.

#### FIGHTING THE OCTOPUS. The concerted attack on the outposts of

the Standard Oil monopoly is proceeding with an encouraging vigor.

While still under a raking fire before the Interstate Commission at Washington, the unscrupulous Trust is called upon to meet a big suit for damages at Buffalo. The points involved in this civil action are the same that resulted last May in the conviction of several Standard Oil minions on the charge of conspiracy.

The facts conclusively established in these cases show that though the Oil Trust controls \$90,000,000 capital, it is not hampered by a cent's worth of conscience.

It remains to be seen whether the shackles of the law are strong enough to restrain this monster monopoly. If not, there should be some sturdy blacksmithing done at Washington and Albany this winter.

#### A GOOD EXAMPLE.

The charming mistress of the White House gave another excellent example to her sex as she sat calmly in her carriage yesterday when the horses fell on the slippery pavement, instead of jumping out at the first indication of danger, as so many women-and men, too -impulsively do.

Other ladies of course do the same sensible thing every day, without exciting comment. But it is one of the penalties or pleasures of high station to be observed; and when a President's wife does the right thing in the right way at the right time-as it is the custom of the present "first lady" to do-the example becomes an object lesson.

Mr. CLEVELAND is indeed a lucky man.

The "meanest man" has turned up again. He is the administrator of a deceased Salemite's estate, who resisted the claim of a barber for shaving the testator fifty two times during his last illness, on the ground that decided in favor of licenses, Editor GRADY, the work was unlawful because done on the leader of the "antis," telegraphs to THE Sunday. The Court made the estate pay, on the ground that the shaving was "essential to health and cleanliness.

> When the Masons put their shoulder to the wheel something generally moves. When the Masons' wives take a hand the combination is irresistible. So, of course, the big Masonic Fair will be a big success. Certainly, Freemasonry never shows itself in better light than when engaged, as it is now, in making provision for the poor and aged.

It will be time enough to stop the subway work on account of frost when the frost comes. The weather, not the calendar, should determine the matter. Give the workingmen a chance as long as possible.

If Mr. GLADSTONE, as stated, is unable to attend a London banquet, it is hardly likely that he will come to this country for the express purpose of confirming the announcement of the knowing Buffalo individual.

Connecticut is agitating the question of the printing and distribution of ballots by the State. Let New York lead in the accomplishment of this important reform.

The nickel-hunting Snanrs will not get possession of Fifth avenue this year, but it would be just as well for the stage company to provide a reasonable amount of convey-

ance for Sunday.

Yesterday we had Indian summer, and to night we are promised a touch of Indian winter from the blizzard-breeding West. And yet some people are not satisfied with the climate.

When the police throw sticks and stones into house-windows, in reply to wordy taunts from the occupants, as they did in Dublin yesterday, the police become themselves the mob.

No teacher, not even experience, has been able to instruct a singer or an oarsman the right time to stop.

Where the name originated it is difficult to tell. There are a hundred answers ready, but the most popular is that when the cholera visited New York a lot of wealthy residents engaged a steamer, sailed out into the sea, dropped anchor at this spot, and there remained until the scare was over. The banks lie about forty-five miles seaward from the harbor, midway between Fire Island and Sandy Hook, and a sail of three hours brings one there. There is no sign of land, as might be supposed, and knowledge of the vicinity is the only guide. In cloudy, weather, when, is the only guide. In cloudy, weather, when, signs are unavailing, the compass is the best guide, and then the lead is used to place the

Where the cod most frequents is partly rocky, and this is the only way of telling whether the bottom is a cod bottom or not The lead is smeared with tallow or a substi whether the bottom is a coll bottom of not. The lead is smeared with tallow or a substitute, and thrown overboard. If, when it is hauled up, grains of sand ching to the bottom of the lead, there is a sandy bottom, and if the lead is punctured, the bottom is rocky. Once the ground is reached the work of lishing begins. The boats are generally crowded, as many as 900 passengers being carried in a single trip in summer, while even now, late as the season is, each Sunday boat carries about four hundred disciples of Izaak Walton.

Skimmer bait is used. When this has been told out among the fishermen at so much a toll, lines are cast overboard and the work begins. With the right day and bait and tide luck generally favors the fishermen and fisherwomen, and cod weighing 10 and 20 pounds are frequently pulled aboard. The best part of half a day is spent on the grounds, and then lines are taken in, the fish sorted and the steamer's bow is turned home-

# SENSATIONAL SCENES AT THE FUNERAL OF HENRY PALETHORPE HAY.

His Sons Declare That He was Ruined by Miss Helen B. Wickersham and Her Mother-He was a Brother of the Late Malcolm Hay-Singular but Straightforward Story Told by the Elder Son.

WASHINGTON Nov. 27 .- The funeral of

Henry Palethorpe Hay, brother of the late Malcolm Hay, of Pittsburg, and former rector of the Church of the Good Shepherd at Rosemont, near Philadelphia, was interrupted vesterday in a most sensational manner. Mr. Hay had lived in Washington for some years. filling a position in the office of the First Auditor of the Treasury and residing in the family of Mrs. Lousia C. B. Wickersham in Le Droit Park. It was generally supposed that Mr. Hay was a bachelor. Even his associates at the office and his neighbors and friends in Le Droit Park had never heard him refer in any way to a wife or family. The gossips of the neighborhood talked about his marked attentions to Miss Helen B. Wickersham, the only daughter of his landlady, a very fascinating young lady about twenty-five years of age, and much speculation was indulged in as to the date of their wedding. When, therefore, the friends and neighbors gathered in Mrs. Wickersham's parlor about the open casket, preparatory to starting to the church, they could not have been more surprised if the dead man had risen from his coffin than they were when two frank, manly-looking young men, who had quietly entered the house, stood up beside the remains and the elder of them, turning to his brother, said:

royal copper facing, with an interior of similar material containing raised figures. A narrow screen of polished brass, with andirons to match, completes the piece: Another is one with a bronze surface and an interior of small tiles inlaid with brass. A heavy brass railing, with irons and tongs of similar material, form the set. A third beautiful pattern is made of onyx with brass trimmings, with interior of the same material. "Here is your father, brought to this through these infamous women, and I want these people to know that we are his sons and have been refused every detail as to the circum-stances of his death and funeral and concerning his spiritual welfare. I speak in justice to the community, which has been grossly deceived as to the relations existing between my father and these women, Helen B. Wicker-sham and her mother. They have wrecked a once happy family and have brought sor-row and irretrievable affliction upon a loving

wife and affectionate children. The company was thunderstruck. At first they thought the young man was a crank, but his words were so straightforward that it was apparent there was some foundation for his statement. A Mr. Stewart, of Phila-delphia, attempted to stop him, reminding him that a funeral was not the place for such a speech, but the young man retorted:

Blood is thicker than water, and we, this man's sons, have a better right to stand beside his coffin than any one else in this

house. THE WOMEN KNEW THEM, EVIDENTLY, While this scene was in progress Mrs. Wickersham and her daughter were upstairs Wickersham and her daughter were upstairs putting on their wraps and preparing to go to the cemetery. "It is a sad story. My father was a clergyman in the Episcopal Church, and in 1883 was rector of the Church of the Good Shep-herd at Rosemont, in the suburbs of Phila-delphia, where the Wickershams then lived. In January of that year he deserted my mother and went to Cinchnati with Miss Helen B. Wickersham. DETERMINED TO ASSERT HIS RIGHTS.

"Have these facts ever been known outside of the family before?"

"Oh, yes. In 1885 my mother was granted a divorce from him, and the ground alleged in the bill was adultery with Miss Wickersham. While the family were all away from home one time father came home and took sham. While the family were all away from home one time father came home and took all the furniture out of the house, and when I went up there last night to see his remains I recognized my mother's furniture that I had been familiar with ever since I knew anything. They refused to even let me enter the house, but I was determined to-day to assert my rights and to let the people among whom they have been living know just what kind of women these are that have used their influence to wreck my father's life and home. I understand that he bought the house they lived in out there and put it in Miss Helen's name, and he made a will under their undue influence and left all his personal property to her."
